

My wife and I do not want any weakening of the DO NOT CALL LIST in Wisconsin that the Consumer Bankers Association is requesting of the FCC. We do not want to be disturbed by any telemarketers or any business making telephone calls to us that we have not solicited information from, and trust that the FCC will not attempt to weaken a state law that the citizens of this state support, or to force Wisconsin to replace its law with a federal law that allows unsolicited calls from financial institutions, their affiliates or any other business or group that does telemarketing activities. Thank you.
